

Ceacam12-Flox

系統名	C57BL/6Smoc- <i>Ceacam12</i> ^{em1(flox)Smoc}
SMOC番号	TBD
維持形態	Developing

遺伝子の概要

Gene Symbol Ceacam12	Synonyms	Ceacam12C1, Ceacam12C3, Ceacam12-C1, Ceacam12-C3, 1600031J20Rik
	NCBI ID	67315
	MGI ID	1914565
	Ensembl ID	ENSMUSG00000030366
	Human Ortholog	CEACAM4

説明

These mice carry loxP sites flanking target exons of Ceacam12 gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Ceacam12 gene.

*Literature published using this strain should indicate: Ceacam12-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..
